We understand why building an Energy HardTech company isn't easy!

Not only do we help startups become investor-ready, but we also support founders with technical and business support for:

- Rigorous techno-economic and lifecycle analysis
- Complex prototyping and testing
- Market Research
- Corporate partnerships
- Sector-specific mentoring

+

We're here to help you through the unique challenges of energy hardtech startups.

REACH begins with a cohort of selected teams, and transitions into specialized ongoing support. This isn't a "one-size-fits-all" accelerator model – your technology is innovative and unique, and so should be your strategies around customers, capital and building a successful team.

REACH supports entrepreneurs who are bringing hardware solutions to the energy sectors of: fossil, nuclear, renewables, buildings, transportation, electricity, sustainable water, regenerative agriculture, and others.

+

Accepted founders/teams receive 12 months of support at NO cost!

That's right – no giving up equity in your company, and no program fees. Just one year of hardtech-based consulting and support to continually reach your business milestones.

Apply online by December 1st at www.reachenergyaccelerator.org – We look forward to receiving your application!
